

P164 Auto Plastic Box Forming Machine

Finished products

Machine detail

- **Application**

Mainly for PVC, APET, PETG materials, heaven and earth plastic box adhesive, without artificial fold, four horns a molding.

- **Feature**

Uses programmable PLC controller control, action standard in place size adjustment with positive and negative double-sided teeth, adjust the size of one step in place, simple operation, glue flow adjustable, full marks, no scratches the situation,

do Product three-dimensional Founder, fully meet the requirements of export products, a machine can save 3-4 artificial.

- **Parameter**

Model	P164
--------------	-------------

Model	P164
Box Length and Width	6-40CM
Box height	0-10CM
Production Speed	700-1000 times / hour
Power	1.2KW
Voltage	220V, customzied
Air pressure	6-8KG / CM3
After-sales Service Provided	24h Online Engineers Service
Weight	450KG
Dimensions(L*W*H):	1.3 * 1.2 * 1.7M
