

CXT16 Automatic Rolls Slit cutting machine

» Features

- With double air shafts for winding.
- The host is frequency-controlled, and the cutting speed is self-determined.
- With round knife, flat knife device and edge blower blowing out.
- With magnetic powder brake to control the tension.
- Equipped with photoelectric deviation correction, it can automatically track the edge of the slitting substrate for precise wire rod slitting.

» Application

Automatic rewinding and slitting of various paper, sponge, film, cellophane, aluminum foil, EVA, foam, leather, cloth, ingot paper, self-adhesive and plastic PVC and other roll-shaped materials.

» Parameter

Model	CXT16
Effective width of slitting	20-1500 mm
slit thickness	0.1-20mm
cutting speed	5-150m/min
unwinding diameter	Φ600mm
Winding diameter	Φ500mm
Power	6.5KW
working voltage	380V
Machine weight	600KG
Dimension	1600x2600x1400mm
